Demonstrate Infrastructure as a Service (IaaS) by creating a Virtual Machine using a Public Cloud Service Provider (Azure), configure with required memory and CPU.

Microsoft Azure portal screenshot showing the "Create a virtual machine" wizard, specifically the "Tags" tab. The page displays a table for adding tags and a "Review + create" button.

**Create a virtual machine**

Tags are name/value pairs that enable you to categorize resources and view consolidated billing by applying the same tag to multiple resources and resource groups. [Learn more about tags](#)

Note that if you create tags and then change resource settings on other tabs, your tags will be automatically updated.
